

# SAFETY EQUIPMENT

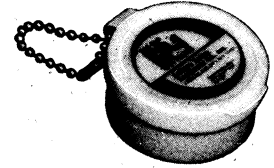

## hearing protectors

- #510**.....
- "Anti-Noise" Protectors
  - Rugged, Comfortable & Lightweight
  - Effectively Seal the Ear
  - Minimum Pressure
  - Permits Conversational Speech & Warning Signals
  - Meets All Requirements of Occupational Safety & Health Act

## kleen air masks

- #505**.....
- #506**..... **Box of 25**  
(Replacement Filters)
- Protects Against Non-Toxic Dusts, Mists & Paint Sprays
  - Pliable Lightweight Frame Molds to Facial Contours

## ear plug

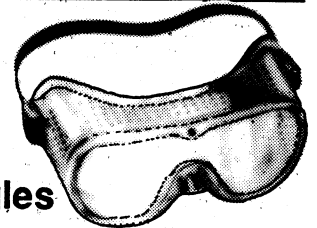

- #512**.....
- Molded of soft elastomeric plastic. Lightweight, non-irritating. Offer effective attenuation, permit hearing at normal conversational levels. Insert, turn tab to back. Resistant to ear wax and soil. Will not deteriorate or harden. Washable. One pair per plastic carrying case.

## safety caps

Complies with OSHA Requirements...  
N.Y. State B.S.A. approval No. 7566/Wash.,  
D.C. approval No. D.C.I.S...571-1

- #345**.....
- New, improved TUF-E head protection - injection molded with high density polyethylene.
  - Penetration, impact, chemical and voltage resistant.
  - Popular rain trough design prevents water from running down neck.
  - 4-point or 6-point suspension, with built-in nape strap. Fully adjustable for head sizes 6-1/2 to 8.
  - Weighs only 11-1/2 ozs. each, packed 20 per carton.

## goggles

- #438**.....
- Soft Vinyl Frame
  - Perforations for Maximum Ventilation
  - Optical Quality • Distortion Free
  - Clear Body & Lense • Splash Proof

# FLASHLIGHTS

## SLIP-ON WAND LIGHT

SELF-STORING WAND

(Batteries Not Included)

2-D Cell yellow case with 6-1/2" self-storing fluorescent orange wand of flexible vinyl.

- 1** Use as a handy FLASHLIGHT!

- 3** Self-storing wand.
- 4** No pilot should be without this light! **#548**.....

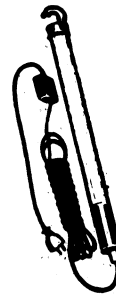

# SAFETY LIGHTS

## extension light

Portable fluorescent, OSHA approved 15 watts, 110 volts. Safe, rugged, burns cool, cord-reach 20 feet. Heavy duty. Comes with on/off switch.

#29 ..

**220V Available**

## midget light

6 watt 14 ft. coiled cord. 12" OAL

#6cc .....

## Heavy Duty Lights for HAZARDOUS LOCATIONS

The Hazardous Locations Fluorescent Work Light represents the ultimate in safety and dependability for work in high-hazard areas.

- **Designed to aircraft specifications.**
  - All aluminum body, with special compounded bumper guards & end caps, protects against damage from falling objects, bumping or dropping.
  - Enclosed ballast, remote from light, to keep heat from work area. All ballasts are high voltage tested to a minimum of 1500 volts, from coils to frame & coil to coil. (Isolated Ballast Available.)
- Plug:** Explosion proof plug is required. The hazardous (classified) location ratings of an attachment plug may be more restrictive than those of the light assembly. In such cases the ratings of the attachment plug take precedence. If light is to be hard wired, an explosion proof wall fixture must be used.  
Furnished without plug.

**220V, 50 HZ  
ALSO AVAILABLE**
