

# ABRASIVE BLASTING EQUIPMENT

FLOOR MODELS

Dee-Blast Abrasive Blast Systems are dry cleaning, finishing and polishing systems for use with most common abrasives, including glass beads, aluminum oxide, garnet, walnut shells, etc. An exterior on-off switch controls the exhaust fan and lighting. Cabinet is sealed at windows, door openings, and at bottom of hopper where media is discharged. Internal gun system is designed to produce various finishes, fine to coarse. Cabinet operates under negative pressure. Blast system is a venturi type. Through the design of the gun system, the air picks up the media through a tube inserted into the media and blasts it through the nozzle.

## AIR SPOT BLASTER

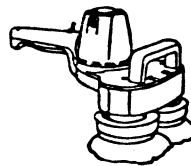

with four nozzles

#R201 .....

For doing small touch-ups or cleaning around rivet holes, etc. — Blasting material is recycled in the closed system and is used many times over, no ventilation required. Leaves a perfect etched surface for filing, painting, etc.

## CYCLO AERO POLISHER

Developed for the aircraft industry, the Cyclo Wonder Tool is government approved for the high exacting demands of cleaning and polishing. It is used by most major airlines and aircraft manufacturers and will polish any surface—flat, curved, concave or convex without gouging, marring or burning, as a rotary polisher may do. Leaves no swirl marks, gives a beautifully polished

finished. Even a beginner can do a professional job quickly, easily safely. Also used as a swirl free sander, scrubber, stripper and cleaner.
